## Continuous Bimanual Trajectory Decoding of Coordinated Movement from EEG Signals (supporting document)

Yi-Feng Chen, Member, IEEE, Ruiqi Fu, Junde Wu, Jongbin Song, Rui Ma, Yi-chuan Jiang, Graduate Student Member, IEEE, and Mingming Zhang, Senior Member, IEEE

## I. EXPERIMENT AND RESULTS

## A. Experimental Paradigm

Four videos have been presented as Supplementary Movie\_S1, Supplementary Movie\_S2, Supplementary Movie\_S3, and Supplementary Movie\_S4, respectively. In Supplementary Movie\_S1, we show how to control the moving of circles on the monitor by moving the real hands. The velocity and position of real hands are tracked by the Leap Motion device and used to update the position of the circles. Supplementary Movie\_S2, Supplementary Movie\_S3, and Supplementary Movie\_S4 show bimanual movement tasks, left-hand movement tasks, and right-hand movement tasks in the experiment. In these three videos, we show how to control the movement of circles by moving the real hands to reach targets.

## B. Experiment Results

The correlation coefficient (CC) and normalized root mean square error (NRMSE) after 10-fold cross-validation on each subject were calculated for both bimanual session (both-hands movement) and unimanual session (left- and right-hand movement). The results of all 13 subjects were presented in Tables SI and SII.

TABLE SI
THE CORRELATION COEFFICIENT (CC) BETWEEN THE RECORDED TRAJECTORIES (POSITION AND VELOCITY) AND THE DECODED ONES BY DIFFERENT MODELS DURING BIMANUAL AND UNIMANUAL MOVEMENTS. ALL RESULTS WERE CONDUCTED USING 10-FOLD CROSS-VALIDATION. SUBLECT 1 – SUBLECT 6
